Healthy ever after
You wish your fluffy, feathered or furry friend a healthy, long life? That’s where we can help. From aviary birds to cats, from bees to pigeons and from dogs to horses, they all benefit from the Biové® Laboratoires products. Discover the more than 30 products in this range that help you in the day-to-day care of your smallest biggest friend. We believe that healthy animals make happy people. So smile!

European quality worldwide
Our Biové® Laboratoires products are made in Europe and distributed all over the world. This brand is especially designed to boost the health of the smallest of animals, because they can use some special attention and care.
**CLAVUCILL®**

Composition per 50 mg tablet:
40 mg Amoxicillin + 10 mg Clavulanic acid
Composition per 250 mg tablet:
200 mg Amoxicillin + 50 mg Clavulanic acid
Composition per 500 mg tablet:
400 mg Amoxicillin + 100 mg Clavulanic acid

**Indications:**
The ingredients have a notably broad spectrum of bactericidal activity against gram-positive and gram-negative bacteria commonly found in dogs and cats. The combination acts synergistically to treat bacterial infections that would otherwise have been resistant to Amoxicillin alone. Clavucill® is the first-choice antibiotic for pneumonia, subcutaneous abcedation, bite wounds, gastro-enteritis infections, bladder infections, sepsis and after any kind of surgery.

- 100 tablets per box (10 x 10 tablets per blister)

---

**PILUDOG**

Composition per tablet:
Megestrol 8.9 mg

**Indications:**
Piludog contains megestrol acetate, this hormone is similar to the naturally occurring progesterone. Because of its anti-oestrogen properties and steroidal effects it is used to prevent and interrupt the heat cycles and to treat lactation induced in false pregnancy in female dogs and cats. In male dogs and cats it treats hypersexuality.

- 16 tablets per box

---

**UNIVERM® TOTAL**

Composition per tablet:
- 200 mg Fenbendazole
- 144 mg Pyrantel
- 50 mg Praziquantel

**Indications:**
Univerm® total is a novel broad-spectrum anthelmintic for the treatment of mixed infections and control of nematodes, cestodes, trematodes in adult and immature form in dogs. Univerm® total has a triple action: it kills parasites, protects humans and improves the environment.

- 20 tablets per box (2 x 10 tablets per blister)

---

**BIAVERM®**

Composition per tablet:
- 21.2 mg Levamisole
- 400.0 mg Niclosamide

**Indications:**

- 12 tablets per box (2 x 6 tablets per blister)
**ASCOPET®**

**Composition:**
- Ascophyllum nodosum

**Indications:**
The neutraceutical Ascopet® is based on the seaweed Ascophyllum nodosum. Harvested in the cold coastal waters of Norway, cut fresh, prepurified and dried at cold temperature to maintain the highly unique content of sulfated polysaccharides, vitamins, minerals and iodine. Ascopet® restores the natural balance. Ascopet® restores gastro-intestinal health (flatulence) and is especially indicated in case of coprophagy. Furthermore, the constituents nourish the fur, prevents hair loss and gives it a healthy shine.

- 200 g jar and 500 g jar

---

**WOU**

**Composition:**
- Minerals (calcium, phosphorus and magnesium)
- Vitamins (A, D3, E, B6, B12, B1, C and other vitamins from the B group)
- Methionine, Choline and Betaine
- Trace elements

**Indications:**
Wou is an association of minerals, vitamins and trace elements intended to compensate the food deficit. In dogs, Wou contributes to balance the dog’s feed ratio, growth, pregnancy and lactation performances.

- 500 g jar

---

**LYPROFLEXTA®**

**Composition:**
- Green Lipped mussel oil
- Hyaluronic acid
- Vitamin E

**Indications:**
A unique, pure naturally, high-quality flavoured capsule for dogs and cats that improves the joints movement. The capsules contain Green Lipped mussel oil, rich in Hyaluronic acid and exclusive, high-quality omega-3 poly-unsaturated fatty acids (among others ETA’s). This combination leads the preservation of the cartilage and the lubrication of the joints. Professionals recommend Lyproflexta in case of arthrosis, overweight, hyperactivity and pre-surgery and for newborn and old animals.

- 60 capsules per box (2 x 30 capsules in a blister)
CUNIXOCIL
Composition per mL solution:
100 mg Sulfadimethoxine

Indications:
Prevents and treats coccidiosis in pigeons and cage birds. By using pharma grade Sulfadimethoxine, a long-lasting Sulfphonamide, we created a highly effective medicine. It prevents and treats hepatic and intestinal coccidiosis and respiratory and digestive infections.

- 125 mL bottle

CORYLAP
Composition per mL solution:
• 75 mg Sulfadimethoxine
• 15 mg Trimethoprim

Indications:
Treats and prevents respiratory infections, digestive infections, and digestive coccidiosis. Corylap is a highly concentrated veterinary medicine, intended to be dissolved in milk, liquid food or water. Be sure to allow treated animals to drink enough fresh water. After treatment, a supporting cure with Hepatoveto® is recommended.

- 60 mL bottle and 250 mL bottle

ENTOCUNIMYCINE
Composition per gram powder:
23 mg Neomycin

Indications:
Powder for administration in drinking water or replacement milk. Entocunimycine treats bacterial diarrhea in rabbits and cavies. The cell wall injury induced by the β-lactam compounds allows high incorporation of Entocunimycine by the bacterial cell due to greater accessibility to the cell membrane.

- 130 g jar
COCCILYSE
Composition per mL solution:
100 mg Sulfadimethoxine

Indications:
Prevents and treats Coccidiosis in pigeons and cage birds. The long-lasting sulfphonamide in Coccilyse prevents and treats intestinal coccidiosis, atoxoplasmosis and respiratory and digestive infections. Treated birds need access to fresh water. After treatment, a supporting cure with Hepatoveto® is recommended.

- 125 mL bottle

ANTI CORYZA
Composition per mL solution:
- 255 500 I.U. Spiramycin
- 12 mg Ascorbic acid

Indications:
Anti coryza has a high affinity with the mucus membranes of the nasal passage and the pharynx, also the lung tissue is favoured by the drug. Anti coryza is highly active against gram-positive bacteria, mycoplasma and chlamydia. This spectrum makes the product your ideal tool to treat and prevent acute snot.

- 90 g jar

ACTI DOXY 5
Composition per gram powder:
- 50 mg Doxycycline
- 250 mg Anhydrous citric acid

Indications:
Acti doxy 5 is the perfect partner to combat respiratory issues like ornithosis, psittacosis and air sack infections in pigeons and cage birds. Acti doxy 5 can also be used for ocular infections caused by Chlamydia psittaci or Mycoplasma.

- 100 g sachets, 10 sachets per box

TRICHOLYSE
Composition per gram powder:
24 mg Dimetridazole

Indications:
Tricholyse is a palatable water-soluble powder for pigeons for the treatment and prevention of Trichomoniasis (Trichomonas gallinae or Trichomonas columbae). It treats crop canker and prevents any further destructive effects due to the infections. With an efficacy against bacterial and fungal infections, it keeps pigeons healthy and free from infection during the racing season. The powder is highly soluble in water and easy to administer.

- 145 g jar
ALAZOL
Composition per mL solution:
166.87 mg Dimetridazole

Indications:
Birds who are not regularly treated for trichomoniasis (the yellow) have the parasite latently present. In periods of stress or at reproduction this causes serious problems. Alazol is a water-soluble solution for the treatment of protozoa. Alazol is well absorbed after oral administration. Its protein binding is low and it enjoys good tissue diffusion.

- 60 mL bottle and 250 mL bottle

C.C. VER SOLUTION
Composition per mL solution:
20 mg Levamisole

Indications:
C.C. Ver Solution is an anthelmintic for the treatment of infestation for the Ascaridia columbae and Capillaria obsignata.

- 125 mL bottle

TENIVERM 3.0
Composition per capsule:
• 50.9 mg Levamisole
• 240.0 mg Niclosamide

Indications:
Teniverm 3.0 is an anthelmintic for the treatment of gastrointestinal nematodes and cestodes in cage birds and pigeons. Teniverm is a complete treatment for roundworms, capillaries and tapeworms. Its excellent tolerance allows deworming of racing pigeons during the sporting season without fear of causing a drop in fitness.

- 50 or 200 capsules in a jar

PICAGIX
Composition per gram powder:
Lysine, Méthionine, Magnesium, Sodium

Indications:
Picagix is a supplement developed to restore the balance between amino acids and mineral salts. Restoring this balance will eliminate pecking and aggressiveness of your birds. Specialists advise to use it after trauma, and promote the combined use with Vitavil Amine or Lactacal.

- 200 g jar

VITAVIL AMINE
Composition per gram powder:
• Vitamins (A, D₃, E, C, B₁, B₂, B₅, K₃, B₁₂, B₁₇)
• Amino acids (Arg, Cys, Ile, Lys, Met, Tyr, Val)
• Aromatic substances (Leu, Phe, Ser, Ala, Asp, Glu, Gly, Pro, His)

Indications:
Vitavil Amine has to be used as support during deworming, anticoccidial and anti-infective treatments. Professionals advise the usage during demanding periods such as breeding, growing/rearing of young animals, moulting and exhibition. For Psittaciiformes it is recommended as a standard treatment of 2 days/week the whole year.

- 190 g jar
OTHER PRODUCTS PERFECT FOR YOUR SMALLEST BIGGEST FRIENDS

BIACALCIUM
Composition per gram powder:
• Minerals (Calcium 17%, Phosphorus 10%)
• Vitamins (A, B₁, B₂ and other vitamins from the B group, C, D₃, E and K₁)

Indications:
Biacalciump provides a high quality calcium that is easy absorbable and accessible for the body. It is of essence during rapid growth stages, lactation, gestation and during the lay. Experts recommend to combine it with Vitamin AD₃E.

• Box of 500 g

HEPATOVETO®
Composition per mL solution:
• 20 mg Lysine
• 600 mg Sorbitol
• 270 mg Propylene glycol
• Herbal extracts

Indications:
Hepatoveto® galvanizes the endocrine system. The stimulation of the pancreas together with the unique combination of plant extracts gives an appetite boost. The overall result is an increased immunity and a decrease of stress and mortality.

• 250 mL bottle

VITAMIN AD₃E
Composition per mL solution:
• 100 000 IU Vitamin A
• 20 000 IU Vitamin D₃
• 20 mg Vitamin E

Indications:
Invigorates growth, heat and reproduction. Tailors the expansion of the capillaries and epithelia. Prevents bone deformation.

• 1 L bottle
ACTI SELEN
Composition per mL solution:
• 100 mg Vitamin E
• 110 µg Selenium

Indications:
Acti selen is a supplement for rearing. It prevents and treats unfertilized eggs and early embryonic mortality.

125 mL bottle

BIOVITASE
Composition per mL solution:
• 605 µg Iron chloride (III) hexahydrate • 376 µg Copper chloride dehydrate
• 443 µg Manganese chloride tetrahydrate • 3.6 mg Vitamin A • 50 µg Vitamin D₃
• 10.75 mg Vitamin E • 5 mg Vitamin B₆ • 500 µg Vitamin B₁₂ • 3 mg Vitamin B₁
• 50 µg Vitamin B₁₂ • 6 mg Nicotinamide • 6 mg Vitamin K₁ • 10 µg Biotin
• 13.8 µg D-Panthenol • 2.5 µg Vitamin C • 8 mg Choline chloride
• 10.5 mg DL-Methionine • 15 mg Propylene glycol
• 1 mg Magnesium gluconate • 200 µg Sodium chloride

Indications:
Biovitase provides the required nutrients during demanding periods such as breeding and rearing. It contributes to the development of a healthy plumage, which makes it ideal during the moult period. Professionals endorse that Biovitase meets the nutritional needs, and they point out that additional calcium in the drinking water will further increase the positive effects.

125 mL bottle

LACTACAL
Composition per mL solution:
• 13.55 mg Iron • 0.150 mg Zinc • 0.19 mg Copper • 2.5 mg Choline chloride
• 0.25 mg L-Lysine • 0.6 mg DL-Methionine • 6.29 mg Manganese

Indications:
Lactacal supports animals at times of specific needs such as during pregnancy, lactation, weaning and lay peak.

125 mL bottle and 500 mL bottle
